

LeRoy Bessler, PhD

Dr. LeRoy Bessler has been a frequent speaker at software user conferences in the US, Canada, and Europe. His research and development work has focused on communication-effective graphs and reports. Other interests include SAS Administration, web information delivery, highly formatted Excel reporting from SAS, custom-developed tools to support SAS servers and SAS software users, and Software-Intelligent Application Development methods to maximize Reliability, Reusability, Maintainability, Flexibility, and Extendability. LeRoy has enjoyed supporting SAS users, software, servers, and data, as well doing SAS application development, both as an employee and now again as a consultant.
